

AI-Powered BizOps Management Playbook

Automate people ops, finance, CRM, compliance, and reporting — from a single AI stack.

BambooHR · Gusto · QuickBooks · Stripe · HubSpot · Notion · n8n and more

MCP servers across every function6 operational domains coveredTool costs tracked per card

FIVE CORE PILLARS

People & HR ops Hiring, onboarding, payroll & performance	Financial planning Budgets, reporting, cash flow & compliance	Stakeholder & investor Comms, board updates, relations & legal	Process & delivery Cross-functional ops, docs & vendor mgmt	Strategy & analytics OKRs, metrics, forecasting & FP&A
---	---	--	---	--

TOOL STACK OVERVIEW · FULL DETAIL ON PAGES 2–3

CORE AI		
Claude	Strategic thought partner — exec briefs, policy drafts, board summaries, framework coaching	~\$20–40/mo · API
PEOPLE & HR		
BambooHR MCP	Employee directory, time-off, onboarding workflows, performance reviews	~\$10/mo · MCP
Gusto MCP	Payroll runs, benefits admin, contractor payments, tax filings	Plan-based · API
Workable MCP	Job postings, candidate pipeline, hiring workflows, offer management	~\$15/mo · MCP
FINANCE & ACCOUNTING		
QuickBooks MCP	Invoicing, P&L reports, cash flow, AR/AP aging, expense tracking	~\$0–15/mo · API
Xero MCP	Real-time accounting, bank reconciliation, financial reporting	~\$0–10/mo · MCP
Stripe MCP	Payment data, subscription metrics, revenue reconciliation	~\$0–5/mo · API
CRM & COMMUNICATIONS		
HubSpot MCP	Contacts, deals, investor comms, engagement tracking, pipeline	~\$0–10/mo · MCP
Gmail + Cal MCP	Executive comms, board meeting prep, stakeholder follow-ups	Included · MCP
Slack MCP	Team signals, decisions, blockers, cross-functional updates	~\$0–10/mo · MCP
OPS & WORKFLOW AUTOMATION		
Notion MCP	Policy docs, SOPs, board decks, OKR tracking, meeting notes	~\$0–5/mo · MCP
Linear / Jira MCP	Cross-functional project tracking, initiative roadmaps, dependencies	~\$0–15/mo · API
n8n — Orchestration	Ties all tools together: payroll triggers comms, Stripe feeds QBO, HR fires onboarding	~\$20/mo · Self-host

Tool Deep-Dives

What each tool does, why it matters, and how the AI uses it

Page 2 of 4

CORE AI ASSISTANT

Core AI assistant

~\$20–40/mo · API

Claude — Strategic thought partner

WHY IT MATTERS

The central reasoning engine for biz ops. Handles drafting, synthesis, and judgment across every function — from board-ready P&L summaries to HR policy rewrites.

HOW THE AI USES IT

Drafts investor updates, policy documents, compliance briefs, and OKR narratives from raw data. Answers operational framework questions and coaches on process design.

Cost: ~\$20–40/mo · Integration: API

PEOPLE & HR

People & HR

~\$10/mo · MCP

BambooHR MCP — Employee lifecycle management

WHY IT MATTERS

BizOps managers lose hours to HR admin — headcount lookups, PTO approvals, onboarding status checks. BambooHR MCP brings all of that into a single AI-accessible layer.

HOW THE AI USES IT

Queries employee directory and org charts, tracks time-off by team, monitors onboarding task completion, pulls performance review data, and surfaces hiring pipeline status.

Cost: ~\$10/mo · Integration: MCP

People & HR

Plan-based · API

Gusto MCP — Payroll, benefits & contractors

WHY IT MATTERS

Payroll and benefits are the highest-stakes recurring ops task. Errors are expensive and compliance failures are worse. AI-assisted review before every run closes that gap.

HOW THE AI USES IT

Reviews payroll pre-run for anomalies, confirms tax withholdings, tracks contractor payment status, monitors benefits enrollment gaps, and drafts payroll-related comms to staff.

Cost: Plan-based · Integration: API

People & HR

~\$15/mo · MCP

Workable MCP — Recruiting & hiring workflows

WHY IT MATTERS

Hiring is time-intensive and unstructured. Workable MCP lets AI manage candidate pipelines, draft outreach, and flag stalled stages without anyone manually checking the ATS.

HOW THE AI USES IT

Tracks active job posts and applicant stages, surfaces candidates that need follow-up, drafts offer letters, syncs hired candidates into BambooHR onboarding workflows.

Cost: ~\$15/mo · Integration: MCP

FINANCE & ACCOUNTING

Finance & accounting

~\$0–15/mo · API

QuickBooks MCP — Accounting & reporting

WHY IT MATTERS

Financial reporting is the connective tissue between ops and leadership. Manual report pulls kill hours. QuickBooks MCP makes P&L, cash flow, and AR instant conversational queries.

HOW THE AI USES IT

Pulls P&L and balance sheet on demand, surfaces AR/AP aging, tracks expense categories vs budget, flags unusual transactions, and drafts board-ready financial narratives.

Cost: ~\$0–15/mo · Integration: API

Finance & accounting

~\$0–10/mo · MCP

Xero MCP — Real-time accounting & reconciliation

WHY IT MATTERS

For teams already on Xero, MCP access gives AI live visibility into the general ledger, bank feeds, and invoicing — replacing weekly manual exports with always-on intelligence.

HOW THE AI USES IT

Queries live account balances and bank reconciliation status, surfaces unpaid invoices, generates variance explanations month-over-month, and flags cash flow risks early.

Cost: ~\$0–10/mo · Integration: MCP

Finance & accounting

~\$0–5/mo · API

Stripe MCP — Revenue & payment intelligence

WHY IT MATTERS

For SaaS or subscription businesses, Stripe is the source of truth for revenue. AI-readable Stripe data means MRR, churn, and payment health feed directly into operational reporting.

HOW THE AI USES IT

Tracks MRR, ARR, and churn rates, surfaces failed payments needing follow-up, reconciles Stripe revenue with QuickBooks/Xero, and generates subscription health summaries.

Cost: ~\$0–5/mo · Integration: API

CRM & COMMUNICATIONS

CRM & communications

~\$0–10/mo · MCP

HubSpot MCP — Investor & stakeholder CRM

WHY IT MATTERS

BizOps often owns investor relations and partner comms without a dedicated tool. HubSpot MCP turns it into a structured pipeline — with AI tracking engagement and flagging gaps.

HOW THE AI USES IT

Tracks investor contacts and engagement timelines, monitors deal stages for partnerships, surfaces contacts needing outreach, and drafts personalized investor update emails.

Cost: ~\$0–10/mo · Integration: MCP

CRM & communications

Included · MCP

Gmail + Google Calendar MCP — Executive comms

WHY IT MATTERS

Board prep, compliance threads, and vendor negotiations live in email. AI-connected Gmail means nothing falls through the cracks and every follow-up is drafted before it's needed.

HOW THE AI USES IT

Scans for unanswered threads from investors, board members, and legal. Drafts follow-up emails, prepares board meeting agendas, and tracks approval chains across stakeholders.

Cost: Included · Integration: MCP

CRM & communications

~\$0–10/mo · MCP

Slack MCP — Internal signal monitoring

WHY IT MATTERS

Real-time operational decisions, blockers, and cross-functional friction surface in Slack first. Without this, the AI is blind to the most active signal channel in the org.

HOW THE AI USES IT

Monitors key channels for blockers, budget questions, and compliance flags. Summarises overnight threads, drafts responses to stakeholder pings, feeds signals into weekly ops reports.

Cost: ~\$0–10/mo · Integration: MCP

OPS & WORKFLOW AUTOMATION

Ops & workflow automation

~\$0–5/mo · MCP

Notion MCP — Knowledge, policy & OKR hub

WHY IT MATTERS

BizOps is the keeper of company knowledge — SOPs, board decks, compliance policies, and OKR frameworks. Notion MCP makes all of it AI-readable and always current.

HOW THE AI USES IT

Reads and updates SOPs, drafts new policies from AI-generated templates, maintains OKR progress pages, generates board deck structures, and archives meeting summaries automatically.

Cost: ~\$0–5/mo · Integration: MCP

Ops & workflow automation

~\$0–15/mo · API

Linear / Jira MCP — Cross-functional delivery

WHY IT MATTERS

BizOps drives initiatives that span every team. Without structured tracking, things slip. AI-connected project tracking means the ops manager always knows status without chasing.

HOW THE AI USES IT

Tracks cross-functional initiative health, surfaces stalled tasks and owners, creates action items from meeting notes, generates weekly initiative summaries for leadership.

Cost: ~\$0–15/mo · Integration: API

Ops & workflow automation

~\$20/mo · Self-hosted / Cloud

n8n — Agentic workflow orchestration

WHY IT MATTERS

n8n is the glue that makes the entire stack act as one system. It connects every signal source and tool into automated pipelines — eliminating the manual handoffs that burn BizOps time.

HOW THE AI USES IT

New hire in BambooHR triggers Slack welcome and Notion onboarding doc. Stripe payment failure alerts ops channel. Gusto payroll run triggers QuickBooks reconciliation. All automated.

Cost: ~\$20/mo · Integration: Self-hosted / Cloud

Automation Flow, ROI & Principles

Weekly cadence, time reclaimed, and responsible AI guidelines

Page 4 of 4

WEEKLY AUTOMATION FLOW

MONDAY Intake & triage AI scans Gmail, Slack, and Notion overnight. Flags board asks, compliance items, and blockers. Weekly ops agenda drafted.	TUE-WED Ops pulse QuickBooks and Stripe metrics reviewed. Payroll anomalies flagged. BambooHR headcount and PTO checked. HR actions surfaced.	THURSDAY Reporting synthesis AI drafts weekly ops report from all signals: financials, headcount, project health, and investor pipeline. Ready in under 5 min.	FRIDAY Comms & updates Board and investor updates drafted. Notion SOPs updated. n8n confirms all automated workflows ran. Next-week risks pre-loaded.	AS NEEDED Escalation briefs Cash flow drops, compliance flags, or payroll errors trigger a solutions-oriented brief drafted for leadership review.
--	---	--	---	--

HOW N8N ORCHESTRATES THE FULL BIZOPS STACK

n8n — the orchestration layer that ties the entire BizOps stack together

n8n is the operational backbone that closes every loop. New hire added in BambooHR triggers a Slack welcome message and Notion onboarding doc automatically. Stripe payment failure routes to the ops Slack channel and creates a QuickBooks reconciliation task. Gusto payroll run completion triggers a finance summary in Notion. Compliance deadlines in Google Calendar fire reminder workflows across the team — eliminating the manual handoffs that consume BizOps time daily.

ESTIMATED VALUE PER WEEK

3–5h Reporting & board prep	2–3h Payroll & finance review	2–3h HR admin & onboarding	1–2h Investor comms & follow-ups	1–2h Slack triage & escalations	\$100–350 Est. monthly tool cost
---------------------------------------	---	--------------------------------------	--	---	--

MONTHLY COST BREAKDOWN

Included / \$0	Gmail, Calendar, Google Drive MCP (Google Workspace)
~\$10–20/mo	BambooHR MCP · Workable MCP at typical BizOps call volume
~\$15–25/mo	QuickBooks MCP · Xero MCP · Stripe MCP read-only API access
~\$10–20/mo	HubSpot MCP · Slack MCP · Notion MCP
~\$20–40/mo	Claude API usage at moderate volume (reports, briefs, policy drafts)
~\$20/mo	n8n — self-hosted (free) or n8n Cloud; scales with workflow volume
~\$100–350 total	Full stack estimate — varies by Claude API volume and tool plan tiers

RESPONSIBLE AI PRINCIPLES FOR BIZOPS

Human reviews all exec outputs AI drafts; BizOps decides. No automated sends on board or investor comms.	No sensitive data in public models Employee PII, payroll data, and financial records stay out of prompts.	Audit AI outputs regularly Spot-check financial summaries and HR reports weekly for accuracy.	Cost gates on high-volume tasks Set monthly API budget caps. Prioritise the highest-ROI automations first.	Enable, do not replace judgment AI surfaces signals; humans make compliance, hiring, and financial decisions.	Measure ROI & adoption Track time saved, error reduction, and output quality as operational metrics.
